

It's "Molecular Time"

Directions:

1. You have 9 nitrogen base sequences from a section of DNA similar to what you might find in a human. Look for the sequence labeled "living DNA"
2. Find the closest ancestor to the living DNA and place it below the living DNA
3. Place the rest of the sequences in the correct order, from present (living) to oldest ancestor.

Living DNA

A	C	A	T	A	T	T	A	C
---	---	---	---	---	---	---	---	---

Sample Z

T	T	A	G	T	T	T	A	A
---	---	---	---	---	---	---	---	---

Sample M

A	T	A	G	T	T	T	A	A
---	---	---	---	---	---	---	---	---

Sample X

A	T	A	T	A	T	T	A	C
---	---	---	---	---	---	---	---	---

Sample Q

A	T	A	G	T	T	T	A	C
---	---	---	---	---	---	---	---	---

Sample D

A	T	A	G	A	T	T	A	C
---	---	---	---	---	---	---	---	---
